

# Nicolas Navarrete

## Full Stack Web Developer

Mendoza - Argentina

## Professional Summary

I am a Full Stack developer with background in sales and management of technologies such as React, CSS, Angular, NodeJs and sql technologies. I have participated in the development of individual and group projects working with Scrum methodology which has helped me to improve skills such as organization, communication and coordination.

## Projects

### Across Space – (august 2023)

Web application development where I was able to implement new frontend tools such as Angular and Bootstrap and backend tools Nest js and MySQL, component management, routing and dashboard

**Repositories:** [Client](#) - [Server](#)

### Study with Pomo – (may 2023)

Development and design of the application with scss in order to improve user efficiency and its organization between work and rest, applying the configuration for the change of style based on the working schedule thus achieving a better feeling for the user and availability for mobile.

**Repository:** [Client](#)

### Final Project Books4All – (april 2023) - (may 2023)

Organization of the design and structure of the application with react, creation of the structure and design of the product section with css, correction of user form's errors, complete design and logistics of the administrative dashboard, Checking of backend for the arrangement of details and database configurations with postgresql, providing my colleagues with code cleaning and troubleshooting from another perspective using node, coordinating daily meetings and conducting the final project presentation.

**Repositories:** [Front](#) - [Back](#)

### Individual Project Find Your Perrito – (march 2023) - (april 2023)

Application in which I applied and demonstrated knowledge formed during my course at Henry, developing server functions, connection to the SQL database and getting data from and API, filter logistics, classification and name search.

**Repositories:** [Client](#) - [Server](#)

## Formation

### Full Stack Developer – Henry – January 2023 – May 2023

More than 800 hours of theoretical and practical study and experience in web development of individual and group projects.
